100	U-CS 100	Assistive Tech	PwDs and caregivers face significant barriers to independent navigation and real-time social communication in unfamiliar day to day environments.	
101	U-CS 101	Building DataOps / MLOps data piplines for energy trading	Automation of end-to-end Data Pipelines from ingestion to analytics / ML	
102	U-CS 102	Hyper-localised weather forecasting	Farmers need timely local weather data for planning, but micro-climate forecasting is difficult due to sparse and noisy station data; this project explores using historical observations to build short-term forecasts of temperature, humidity, and rainfall.

103	U-CS 103	Alumnae Portal	Lack of a centralized platform to engage alumni and former employees leads to weak long-term relationships and missed opportunities for mentorship and knowledge sharing.	
104	U-CS 104	AI Customer Support Chatbot	High volume of repetitive customer inquiries reduces efficiency and increases workload on support staff.	
105	U-CS 105	Shift Handover Management System	Inefficient shift transitions due to poor documentation result in miscommunication and missed tasks.	
106	U-CS 106	Water Production and Sales Management System	Lack of integrated tracking for production, inventory, and sales leads to inefficiencies and inaccurate revenue tracking.

107	U-CS 107	Crew Mobility and Communication Platform	Crew lack real-time access to schedules and updates, causing inefficiencies and communication gaps.	
108	U-CS 108	Unified Project Idea Generator for Multidisciplinary Courses	Students undertake multiple units each semester, each with separate projects involving repeated ideation, documentation, and implementation. Lecturers also independently create project guides and assessments, leading to redundancy, inefficiency, and overwhelming workload for both students and lecturers. Overlapping content across units is not effectively leveraged.

100	U-CS 100	Assistive Tech	PwDs and caregivers face significant barriers to independent navigation and real-time social communication in unfamiliar day to day environments.
101	U-CS 101	Building DataOps / MLOps data piplines for energy trading	Automation of end-to-end Data Pipelines from ingestion to analytics / ML
102	U-CS 102	Hyper-localised weather forecasting	Farmers need timely local weather data for planning, but micro-climate forecasting is difficult due to sparse and noisy station data; this project explores using historical observations to build short-term forecasts of temperature, humidity, and rainfall.

#	Use Case No	Proposed Use Case Title	Problem Statement / Background
103	U-CS 103	Alumnae Portal	Lack of a centralized platform to engage alumni and former employees leads to weak long-term relationships and missed opportunities for mentorship and knowledge sharing.
104	U-CS 104	AI Customer Support Chatbot	High volume of repetitive customer inquiries reduces efficiency and increases workload on support staff.
105	U-CS 105	Shift Handover Management System	Inefficient shift transitions due to poor documentation result in miscommunication and missed tasks.
106	U-CS 106	Water Production and Sales Management System	Lack of integrated tracking for production, inventory, and sales leads to inefficiencies and inaccurate revenue tracking.

#	Use Case No	Proposed Use Case Title	Problem Statement / Background
107	U-CS 107	Crew Mobility and Communication Platform	Crew lack real-time access to schedules and updates, causing inefficiencies and communication gaps.
108	U-CS 108	Unified Project Idea Generator for Multidisciplinary Courses	Students undertake multiple units each semester, each with separate projects involving repeated ideation, documentation, and implementation. Lecturers also independently create project guides and assessments, leading to redundancy, inefficiency, and overwhelming workload for both students and lecturers. Overlapping content across units is not effectively leveraged.
